SUPERIOR CRAFTSMANSHIP

David Bossart, founder and president of Bossart Builders, and his son, Jason Bossart, the company's vice president, have accumulated a vast building portfolio in New Jersey, New York, Connecticut and Virginia that includes numerous single-family developments, multifamily communities and mixed retail spaces. The company has over 25 years of award-winning experience in construction management, design and building services.

Over 15 years ago, Bossart undertook a specialized market close to their hearts – the building of churches. They have brought the specialized market of church building to its highest levels, earning a reputation as New Jersey's foremost builder of churches. They also build affordable housing projects, schools and offices.

As an independent dealer for The Barden & Robeson Corp., one of the largest producers of panelized pre-designed building systems in the Northeast, Bossart has an inside track for direct access to materials that provide cost-effective solutions for clients, such as pre-designed wood systems manufacturers, post and beam, glulam arch companies, pre-cast concrete and pre-engineered steel manufacturers. Since the mid-1990s they have constructed more than 50 church buildings.

"The beautiful church Bossart Builders built for my congregation is 32,000 sq. ft. and is the most beautiful and well-built church facility in our township. Working with Bossart/Barden Builders saved us about 35% of the regional average to build a church. That speaks volumes in itself, but the quality of the structure was even more amazing. I am so pleased with the entire building experience of working with Bossart and Barden Builders, I tell others about it whenever I get the chance. They have been honest, straight-forward, accommodating, clear and very helpful through the entire building process." – Pastor Nash

"We purchased our home in Washington, NJ from Bossart Builders in July of 2006. We have been very impressed with the quality of the construction and the architectural design. It is also clear that the basic construction quality was above average compared to other comparable priced homes that we had looked at." – Deborah & Donald Hutcheson

Arlington Commercial Construction is a commercial site contractor that specializes in services such as Demolition, underground utility work, foundation excavation, foundation repair and waterproofing, septic systems, sidewalks, curbing, parking lots etc... When you choose Arlington you can rest assured that we will deliver economical on-time, on-budget results that meet your exact specifications without cutting corners or using substandard materials.

DEDICATED TO EXCELLENCE

Bossart Builders understands how to build the churches that congregations dream of, and for many years has answered to a higher calling, making church building “not just a business, but a ministry as well.”

Bossart builds big in terms of experience, boundless energy, honesty and integrity, and their own faith. They build for God's Ministries.

Whether they are building a spacious luxury stone chalet, the new addition for an evangelical church, or a 32,000-square-foot Princeton Cathedral, customers experience the same quality materials and services, attention to detail, and dedication to building relationships that will last throughout a lifetime.

“It's very much a people business,” says Jason Bossart. “It's all about building relationships and leading people through the process.”

Linda Cinelli, CCIM, CEA, CRS, is a premier licensed broker in New Jersey, New York and Florida with a nationally and locally recognized clientele. In 2003, after years of experience perfecting all aspects of real estate, she founded LC Realty, and together with her team are a boutique real estate firm that focuses on understanding clients' businesses and solving their challenges.

DETAILS MAKE THE DIFFERENCE

ESS Home Theater provides full audio visual for sanctuaries that the other guys are just too big to match. There's no waiting on hold on a big corporate customer service line just to be transferred to several departments, no dealing with the manufacturer directly if you need warranty work. Our staff is suited to handle projects of all sizes while still treating you with the personal attention you and your home deserve. You will always know exactly who to call whether you have a question about your system's design, function or need service.
